

## Hammer grain additive Better BK-3026

### *Product Description :*

**Better BK-3026** It is an organic modified polysiloxane solution, used for hammering in water-based and solvent based paint systems

Additives can provide excellent hammering effect. The fine hammering effect can be produced at very low dosage. The pattern is thicker at low dosage and thinner at high dosage.

### *Product specifications:*

<i>appearance</i>	<i>Colorless viscous transparent solution</i>
<i>Effective score</i>	10±1%
<i>component</i>	<i>Organic modified Polysiloxane</i>
<i>Solvent</i>	<i>Aromatic mixture</i>

### **Application system and consumption:**

It is applicable to all solvent based systems, such as solvent based aluminum paint, baking paint, air dry alkyd paint and water-based system.

The dosage varies according to different use systems, generally 0.1-3% of the total amount can be added at any stage of production.

### **Packing**

25kg iron bucket

### *Heavy metal content*
