

Polymethylalkylsiloxane leveling agent

Better BF-6313

Product description:

Better BF-6313 Is a solution of aromatic alkyl-modified polymethylalkylsiloxane with 15% active content;

This kind of leveling agent has good leveling effect, can control the directional arrangement of flake metal pigment and dumb powder in the coating film, and the positioning effect is very prominent; This kind of leveling agent can eliminate the brush marks on the facade; In the process of coating production and construction, it can prevent bubbles from forming and defoaming, without affecting the adhesion between layers, and can be repainted; It has a good wetting and smoothing effect on the substrate, which can improve the smoothness and scratch resistance of the film, resist the adhesion and prevent the appearance of the frame.

Product specification:

appearance	Light yellow viscous liquid
Active content%	15
Refractive index	1.49 (25°C)
Solvent	xylene
Specific gravity	0.88g/cm ³ (25°C)
Boiling point	About 139°C/282.2°F
Flash point	>26°C/78.8°F

Scope of application:

1. Matte paint.
2. Automotive paint, industrial paint, metal paint, plastic paint, etc.

Amount and usage:

Addition amount: total formula amount 0.1-1.0 %

Add method: can be added at any stage of the production process.

Packaging and storage:

25、200KG/bucket

Keep away from fire sources and place in a cool and ventilated place

One year under normal storage conditions

Heavy metal content:

content	Sb	As	Ba	Cd	Cr	Pb	Hg	Se	Zn
ppm	<5	<2.5	<10	<5	<5	<5	<5	<5	<10
