

Fluorine-modified polysiloxane leveling agent

Better BF-6303

Product description:

Better BF-6303 It is a fluorine-modified polysiloxane leveling agent with 50 active content.

The characteristics of this kind of leveling agent are:

1. It can reduce the surface tension of the coating and provide a good substrate wetting and good anti-shrinking performance for the substrate which is difficult to be wetted;
2. It can improve surface smoothness and prevent floating color.

Product physical properties:

appearance	Yellowish liquid
Active content%	50
Solvent	Propyl ethoxylate
Specific gravity	0.96g/ml (25°C)
Flash point	>61.8°C/143.2°F

Scope of application:

Suitable for water-based and solvent-based coatings.

Amount and usage:

Recommended dosage of total formula 0.1-0.2 %,

Please test the most appropriate dosage and compatibility before use, which can be added at any stage.

Packaging and storage:

25、200KG/bucket

Keep away from fire sources and place in a cool and ventilated place;

24 months under normal storage conditions.

Heavy metal content:

content	Sb	As	Ba	Cd	Cr	Pb	Hg	Se	Zn
ppm	<5	<2.5	<10	<5	<5	<5	<5	<5	<10
