

# Fluorine modified polyacrylate leveling agent

## Better BF-6390

### *Product Description:*

**Better BF-6390** It is a fluorine modified polyacrylate copolymer with 100% active content and no silicone, and can be coated with a leveling agent.

The characteristics of this type of leveling agent are:

1. It is a fluorine modified polymer leveling agent with excellent leveling and recoating properties;
2. Enhance the wetting of the substrate and prevent the formation of defects such as shrinkage, pinholes, and fish eyes in the coating, while achieving the best leveling performance ;
3. While promoting leveling, it can effectively improve the tactile feel of the paint film;
4. Good compatibility with most paint systems;

### *Product properties:*

Appearance	Transparent yellowish liquid
Non volatile matter%	97
Specific gravity	0.96g/cm <sup>3</sup> (25°C)
Flash point	>100°C /212°F

### *Application scope:*

Solvent based coatings – Automotive repair paint, wood paint, plastic paint, coil steel paint, floor paint, etc.

### *Addition amount and usage method:*

Addition amount: 0.1-1.6.0% of the total formula amount; Under normal circumstances, the addition amount is 0.2-0.5% of the total formula.

Adding method: add later, please test the most appropriate dosage and compatibility before use.

### *Packaging and Storage:*

---

25、200KG/barrel

Keep away from ignition sources and place in a cool and ventilated place;  
Under normal storage conditions, it is 18 months.

***Heavy metal content:***
