

## Modified polyester leveling agent Better BF-6100

### *Product description:*

**Better BF-6100** is a 88% active content modified polyester surface leveling agent. It is used for solvent-based and solvent-free paint systems, with long-wave leveling effect, without affecting the adhesion between layers; It has excellent compatibility with resin, has no adverse effect on gloss, and helps to improve the smoothness and smoothness of the paint film surface.

### *Product physical properties:*

appearance	Colorless to light yellow liquid
Active content% (120 °C, 40 minutes)	>80
Solvent	Adipate
Flash point	greater than100°C/212°F

### *Application scope and characteristics:*

It can be used for solvent-based or solvent-free paint systems of alkyd, acrylic acid, epoxy and polyurethane.

It has the characteristics of improving the fullness of the paint film, not affecting the adhesion between layers, and excellent leveling effect.

### *Add amount and use method:*

Addition amount: 0.5-2.0% of the total formula.

Add method: add later. Please test the most appropriate amount and compatibility before use.

### *Package specification and storage:*

25、200KG/bucket

Keep away from fire sources and place in a cool and ventilated place;

18 months under normal storage conditions.

### *Heavy metal content:*
