

Adhesion promoter

Better BK-3031

Product Description : BK-3031 is a polymer solution without silicone, and the product characteristics are as follows:

1. Improve the adhesion of solvent based coatings to metal substrates.
2. It has good compatibility with various paint systems and can improve the flexibility of the paint film.
3. High temperature baking does not change color and does not affect the weatherability of the coating.
4. The storage stability of the coating will not be affected.

Product specification:

Active ingredient%	70
proportion	0.90g/cm ³ (25°C)
flash point	67°
solvent	Isopropyl alcohol
appearance	Yellowish clear liquid
acid value	80-100mg KOH/g

Scope of application:

Alkyd/amino resin baking varnish Acrylic/amino resin baking varnish.

Amount and usage:

Addition amount: 1-3% of the total formula, both before and after grinding.

Please test the most appropriate dosage and compatibility before use.

Add method: add later.

Packaging specification and usage:

Packing specification: net weight 200kg/25kg.

Storage: Keep away from heat and ignition sources.

Keep it in a cool and ventilated place and keep the container tight.

This product has a shelf life of 18 months from the date of production.

security: This product contains solvent, so it should be handled carefully to avoid contact with skin and eyes. Please refer to the Material Safety Data Sheet for other information.

Heavy metal content:

Content	Sb	As	Ba	Cd	Cr	Pb	Hg	Se	Zn
