

JS Waterproof acrylic lotion Better BWR-7101

Product Description:

BETTER BWR-7101 It is a product that adopts a special polymerization process and is improved on the basis of foreign formulas. It has high chemical and mechanical stability, high resistance to pigments and fillers, high film forming elasticity, good rebound performance, good water resistance and adhesion, excellent acid, alkali, and aging resistance, and is suitable for waterproof coatings.

Product Features:

Water and alkali resistance

Excellent elongation at break

Excellent cement compatibility

Product specifications:

exterior	Milky white liquid
Solid content, %	55±1
PH	8.0±1
viscosity	<500
Glass transition temperature T _g , °C	<-10
Ionic type	anion
Particle diameter, microns	0.25-0.35

Application scope:

JS-Waterproof coating

Packaging specifications and storage:

120kg/barrel 1000kg/barrel

In a cool and ventilated place with a temperature above 0 ° C and a shelf life of 6 months

All the information above is based on latest empirical data obtained at BETTER laboratory and is not to be used for certifying the suitability of the product. Users are advised to test the product in their own system before purchase.
