

High permeability self crosslinking acrylic lotion Better BWR-7051

Product Description:

BETTER BWR-7051 It is a highly permeable self crosslinking acrylic lotion with excellent chemical resistance and adhesion resistance. The lotion has high transparency, high film transparency, less film forming additives and high film fullness. Can be mixed with curing agents.

Product Features:

Lotion is transparent in appearance

Self crosslinking, good chemical resistance and adhesion resistance

Low dosage of film forming additives and high transparency of paint film can be mixed with curing agents

Product specifications:

Appearance	Transparent liquid
Solid content, %	40±1
PH	8.0±1
Viscosity, MPa. s, 25 °C	<1000
Volatile substances	Water
Minimum film-forming temperature, °C	32
Specific gravity, kg/L	1.03

Application scope:

High transparency wooden furniture, high fullness wooden furniture

Wood furniture with high moisture film transparency

Formula recommendations:

In order to achieve better film formation at room temperature, it is necessary to add film forming aids or plasticizers to the formula of Better BWR-7051. Recommended film forming aids are recommended

Dipropylene glycol butyl ether (DPnB), Dipropylene glycol methyl ether (DPM), etc

Packaging specifications and storage:

50, 120, 160kg/barrel

In a cool and ventilated place with a temperature above 0 degrees Celsius, in an original sealed container, with a shelf life of 6 months

All the information above is based on latest empirical data obtained at BETTER laboratory and is not to be used for certifying the suitability of the product. Users are advised to test the product in their own system before purchase.
